Certificate HackerRank

PROFILE

An enthusiastic MERN Web Developer, with hands-on experience building responsive and user-friendly web applications using React, JavaScript, HTML, CSS and MERN stack . Actively learning and working with the MERN stack (MongoDB, Express.js, React, Node.js) to grow into a full-stack developer role. Currently working at FreshMenu as a Jr. Frontend Developer. Looking forward to making a significant contribution to an organization through dedicated effort.

WORK EXPERIENCE

- FreshMenu
Jr. Frontend Developer
- DEC 2024 - Present
Bengaluru, Karnataka.
- Tech Skills: Used a mix of tech tools like Next.js, Tailwind CSS, Redux Toolkit, Node.js, MongoDB, and AWS services used.
 - Kitchen Audit Tool: Developed a kitchen audit application using Next.js to streamline and digitize audit processes, improving operational efficiency and data tracking.
 - OMS (Operational Management System): Enhanced an existing system by redesigning the UI, implementing new features, and improving user interaction. Optimized the platform for mobile responsiveness and better usability across devices.
 - Invoicely (PO Invoice System): Built a purchase order invoicing application using Next.js and TypeScript, enabling efficient invoice generation and management.
 - Teamwork and Code Management:•Used Git and GitHub to manage code andwork effectively with the team.

PROJECTS

- Milkify |
- Developed a dairy web application for milk collection management using React.js, Redux, Express.js, and MongoDB.
 - Implemented user authentication using JWT tokens for secure login, logout, and signup functionality.
 - Designed and implemented effective search, filtering, and sorting options for seamless data management.
 - Built a comprehensive dashboard to display daily milk statistics, farmer information.
 - Instant messaging alert for customers.
 - Secure data validation.
 - Completed all main functionalities of the Milkify web app within the given time constraint.
